Below \$300 million

Note: Companies are included in a given tier by falling within the threshold for two consecutive quarters

*Enterprise Value is calculated as Market Cap on March 31, 2014 plus debt, preferred equity and minority interest less cash

Note: See the following page for specific company classifications

About the EMS Stock Index

Similar to the S&P 500 Index, the EMS Stock Index is a market cap weighted composite index. The index is prepared by first selecting a base period, in this case, Q1 2003, and totaling the market caps of the companies for each tier in this period. This period and total market cap is set to a base index, in this case, 1,000. Next, for each tier, the current period's total market cap is calculated, divided by the base period's total market cap and then multiplied by the base index (1,000). The result is the index value used for plotting in the graph above.

EMS Stock Index Data

	Stock Price	LTM Sales (\$M)	Diluted EPS	Avg. Cash Conversion Cycle (days)	Current Ratio	EV/ EBITDA	EV/ Sales	Market Cap (\$M)	Net Debt (\$M)
