A Powerful Voice...
A Valuable Resource...
A Committed Organization...

For the Industry...by Industry Leaders.

the multinational power electronics association
Since its founding in 1985, the PSMA has strived to advance the interests of the power electronics industry through educational programs, technical forums, networking, conference sponsorship and publications.

Our industry’s power conversion technologies and products are enabling many of the advances in today’s electrical infrastructure and electronics. Once limited to power supplies, PSMA now addresses the wide range of alternative energy devices, energy storage, advances in electronic components and packaging, power conversion and global standards.

PSMA has grown thanks to the dedicated efforts of representatives from industry-leading companies. PSMA is neither an advocacy group nor a standards-setting body. Rather, we are a collective of industry experts that, as our charter says, strives “to enhance the stature and reputation of its members and their products, improve their knowledge of technological and other developments related to power sources and educate the entire electronics industry, plus academia, as well as government and industry agencies as to the importance of, and relevant applications for, all types of power sources and conversion devices.”

This brochure is intended to provide a clear idea of the work of PSMA and the benefits of membership in this exciting and important organization.

As you review its contents, please consider how your company – and you as an individual – could benefit from membership.

We welcome your interest and your questions. Please contact me personally to discuss how to optimize your involvement in PSMA.

Joe Horzepa,
Executive Director
power@psma.com
Benefits that Far Exceed the Cost of Membership

Membership in PSMA provides many important and valuable benefits. The value to you and your company in the engagement with industry leaders in the work of the association is priceless. But beyond that, membership has immediate, tangible value by offering special discounts on PSMA-produced industry reports, reprints of important technical texts and attendance at our flagship event – the Applied Power Electronics Conference (APEC), as well as other PSMA sponsored activities (listed below).

PSMA Technology Reports
PSMA-produced technology reports, valued at thousands of dollars, are offered to members at dramatically reduced cost. Acquiring just one of these reports can more than pay for the cost of membership. Here are just two important examples:

### 2019 Power Technology Roadmap
The 2019 Edition includes hard copy and digital (flash drive) copies of presentations from end-users, power supply manufacturers, component suppliers, consultants and academia. This 11th edition Roadmap provides an outlook on technology trends in power conversion through the year 2023.

**Price:** $4,490  **Member Price:** Free*

---

### 3D Power Packaging Phase III - with Focus on Embedded Passive Component and Substrate Technologies
Phase 3 report on 3D packaging of power sources focuses on passive and substrate technologies. Emerging nanomaterials and processes are described for inductors, capacitors and resistors. Key enabling building-blocks are described for each technology. The manufacturing challenges are also highlighted. Roadmaps are projected for passive component advances and active embedding technologies.

**Price:** $3,490  **Member Price:** Free*

---

PSMA CLASSIC REPRINTS
With permission of the authors, PSMA has republished a collection of out-of-print classic texts dealing with fundamental power electronics technologies. These texts are available to members at up to 50% discount from the retail price. Here's just one example:

### Modern DC-TO-DC Switchmode Power Converter Circuits by Rudolf Severns and Ed Bloom - REPRINT (2009)
This book focuses on the fundamental behavior and characteristics of switch-mode power converters and on the relative merits of many popular topologies.

**Price:** $150  **Member Price:** $100

---

PSMA SPONSORED CONFERENCES, WORKSHOPS AND WEBINARS
In addition to APEC, PSMA sponsors conferences and workshops including: Power Supply on Chip (PwrSoc), International Symposium on 3D Power Electronics (3D-PEIM), Workshop on Wide Bandgap Power Devices (WiPDA), International Workshop on Integrated Power Packaging (IWIPP), International Energy Harvesting Workshop (EnerHarv) and annual pre-APEC Magnetics and Capacitor Workshops.

PSMA webinars throughout the year are presented by invited recognized experts on timely topics addressing technology advances, evolving standards and regulations, application and implementation considerations.

* Regular Members receive one copy of all new PSMA publications and reports, with discounts for additional copies. Affiliate Members may purchase these publications and reports at significantly reduced prices.
Technical Committees and Forums - The Lifeblood of PSMA Membership

Participation in one or more of the PSMA technical committees and forums offers the unique opportunity for members to collaborate on key topics of critical interest to our industry. Technical forums and committees are where the real work of PSMA is done. Your knowledge advances this work and you benefit from interacting with others in a network of industry leaders and influencers.

**CAPACITOR COMMITTEE AND FORUM**
The Capacitor Committee is a group of volunteers knowledgeable about capacitors and power electronics. Members include people from capacitor manufacturers, the power electronics industry and leading consultants. The committee is involved in capacitor design papers, education and design tools.

**ENERGY HARVESTING COMMITTEE AND FORUM**
The mission of the Energy Harvesting Committee is the development of an ecosystem that provides subject matter expertise and direction on adoption and integration of energy harvesting and related energy storage, conversion and efficiency technologies.

**ENERGY MANAGEMENT COMMITTEE AND FORUM**
The Energy Management Technical Committee supports manufacturers, government agencies and standards organizations with education, support and recommendations in matters regarding the energy efficiency of power supplies and system power architectures with, as a primary goal, the establishment of a consistent global standard for energy efficiency. The Committee supports and maintains an up-to-date database on existing Energy Efficiency standards and regulations as well as alerts on impending changes and key meetings that impact the existing standards and regulations.

**INDUSTRY-EDUCATION COMMITTEE AND FORUM**
The Industry-Education Committee promotes and works to improve the communication between industry and educational institutions, to foster awareness and interest in power electronics conversion and control among our youth and to identify the long-term strategic issues of common interest to industry and education. Two courses, one covering the basics of nanotechnology and the second, advanced nanotechnology topics, are available to members on the Industry-Education Forum. The Industry-Education Forum also works to provide other educational resources for students at various levels of academia - middle, high, college and graduate levels.

**MARKETING COMMITTEE**
The PSMA Marketing Committee has, as its primary purpose, the role of publicizing the activities of the association and promoting membership. In addition, the Marketing Committee works to inform industrial, educational and governmental institutions regarding advances in power electronics.

**MAGNETICS COMMITTEE AND FORUM**
The Magnetics Committee members include representatives from power supply companies, wound components producers, core manufacturers and leading consultants. The committee is involved in republishing classic textbooks, making fundamental design papers available and offering education and design tools.
Integral to the annual Applied Power Electronics Conference are the Industry Sessions. These sessions provide a forum for industry experts to discuss their latest developments in products and technology. The themes for these sessions are selected and developed by the PSMA Technical Committees and they identify and invite the best industry professionals to present the topic at the Industry Sessions.

**POWER PACKAGING & MANUFACTURING COMMITTEE AND FORUM**
This Committee provides information and resources on advances in power packaging and manufacturing technologies. Its focus is on high density power packaging design for lowest cost manufacturing, with the goal of achieving global competitiveness for PSMA member companies. The committee recently produced a comprehensive three-part study of technology trends, components and techniques in 3D packaging.

**POWER TECHNOLOGY ROADMAP COMMITTEE AND FORUM**
The Power Technology Roadmap provides a consolidated outlook of trends in power conversion technology for the next two to five years. The trends provided in a report, published every two years, are intended to give a broad outlook of the power conversion technologies, components and applications.

**RELIABILITY COMMITTEE AND FORUM**
The Reliability Committee aims to spearhead industry initiatives to identify and attempt to solve the pertinent industry challenges related to the reliability and performance of power supplies and associated products. Its scope includes anything that impacts the life and desired application of a power supply.

**SAFETY AND COMPLIANCE COMMITTEE AND FORUM**
The mission of the Safety and Compliance Committee is to provide subject matter expertise and information resources, supported with ongoing communications to our constituents, on safety and compliance issues pertaining to power electronics and power conversion. The Committee supports and maintains an up-to-date database on existing safety & compliance standards.

**SEMICONDUCTOR COMMITTEE AND FORUM**
The Semiconductor Committee provides an overview of the semiconductor technology and their use in power converters. The committee periodically updates the status, trends and issues that affect the use of semiconductors in power supplies.

**TRANSPORTATION POWER ELECTRONICS COMMITTEE AND FORUM**
The Transportation Power Electronics Committee covers a broad array of topics applicable to successful expansion of power content in electric drive and hybrid electric vehicles, including packaging, components, energy storage, power distribution, power conversion and motor drives.
PSMA Membership Benefits

By joining with other leaders in the Industry, your company will have a greater voice and influence on the directions of the Power Sources Industry.

- **NETWORKING:** The opportunity to meet and interact with your counterparts in other companies on an on-going basis.

- **VALUABLE INFORMATION:** Members enjoy access to information in the Members Only area of the Web site. Members also receive invitations to upcoming Webinars and Workshops.

- **INVOLVEMENT:** Based on the interests of committee members, members plan and organize APEC Industry Sessions, Webinars, Workshops and Conferences.

- **PARTICIPATION:** Members participate in committees, workgroups and studies to derive a better understanding of market trends, industry trends and better operational procedures to improve performance.

- **DISCOUNTS:** Members receive discounts on registration fees for attending APEC and other PSMA-sponsored events.

- **FINDING TRENDS:** Increase awareness and knowledge of trends and factors that can impact your company.

- **COMPANY PROFILE:** Listing of your company’s profile on the PSMA website with a hyperlink directly to your company website.

- **PSMA PUBLICATIONS:** Regular members receive one copy of all new PSMA publications and reports with discounts for additional copies. Affiliate members may purchase the publications and reports at the member discount price.

- **BENCHMARKING:** Improve the operation of your company by participating in benchmarking studies with other companies in your industry.

- **PSMA NEWSLETTER:** Receive “Update,” the quarterly newsletter of the PSMA, with information on activities in the industry and upcoming events. You may also contribute articles for publication in the "Update."

- **MEMBER COMPANY SPOTLIGHT BANNER:** Feature your company’s products on the PSMA Home Page.

Joining PSMA

**Regular Members** — Manufacturers of power sources and conversion equipment, power semiconductors, power management ICs, passive devices, packaging and other components.

- Annual Dues $950

**Affiliate Members** — Organizations involved in the power industry, including Manufacturer’s Representatives, Distributors, Advertising, Marketing, Consulting and Publications.

- Annual Dues $125

**Affiliate - Education Members** — Individuals, Universities and other organizations involved in education or instruction in power subjects.

- Annual Dues $125, Dues may be waived for qualified persons, institutions or companies.
