

PSMA Energy Storage Committee Meeting Minutes 21 July 2021

Some potential talking points:

- New attendee introductions
- Patrick L. interview featured on Power Electronics News Podcast
<https://www.powerelectronicsnews.com/is-hydrogen-the-next-step-for-energy-podcast/>
- Call for presenters for APEC 2021 Industry Session
 - Please send Ed and I a draft of the title and brief description so that we can start a list.
- Other Topics

Attendees:

Ada Cheng, Brendan Andrews, Fred Weber, John Horzepa, Peter Victor, Ed Herbert, Eric Schneider

Discussion:

- Fred W. asked if the committee members were interested in conducting educational seminars. Brendan A. said he is interested. He will submit a proposal. The seminar could happen later this year. It could also be promoted as a joint Capacitor Committee/Energy Storage Committee seminar since it is about supercapacitors.
- Brendan A. will also propose a trend/roadmap oriented presentation that could be part of a roadmap seminar/session. Ed H will see if the PTR committee would be interested in slotting this session in this year. Brendan would do either the educational seminar or the roadmap presentation, but not both, later this year.
- Ed H. showed a draft of the APEC Industry Session proposal that he will submit next month. There is also a list of potential subjects that Ed included. Some IS subjects could include thermal management for batteries, new technologies for energy storage, and energy recovery.
- Next meeting 18 Aug 2021, 11am CDT.
